

Millennium Garage Doors Inc., 6250 Series is our flagship steel door. The 6250 is a thermally efficient steel front steel back “sandwich style” door. Formed with a unique sculpted raised panel the 6250 series is embossed with a natural wood grain texture and a baked on 2 coat polyester finish. The core is precision molded poly-styrene insulation bound with industrial hot melt urethane glue. This insulation is sandwiched between two reinforced, pre-painted galvanized door skins for highest thermal efficiency. We know that regardless of the model or style of door you choose, you can be certain a Millennium door will add great value and beauty to your home.

Millennium Garage Doors 6250 Series sets the standard when it comes to beauty and durability
